Energy International Group Co. is crude oil, gas and oil derivatives trading company

Being founded in the USA, the company has 3 representative offices in the world:
in the USA – Chicago, Cyprus – Nicosia, United Kingdom – London and the subsidiary in Ukraine, Kiev –
“Energy International Group – Trading”, LLC.

Our global network of experienced professionals works with many of the world’s leading oil and gas companies, fast-growing organizations and private equity firms on many highly complex deals in the global market, providing professional level of efficiency through our solid networking that makes us one of the most reliable companies in this field.

EIG values simplicity in delivery and relationship foundation built on transparent, mutually beneficial and long-standing partnership with our clients.

We pursue the goal with minimum risks and maximum outcome. Energy International Group manages to distribute energy worldwide in an efficient and responsible way.

EIG is performing its functions in routine circumstances and procedures that are taken by mutual decision. Our corporate culture is aimed at developing of strong, successful, long-term and strategic relationship with our partners.

Who are our clients?

Leading chemical, industrial, airline and national oil companies are among those who use the services of Energy International Group and haven't lost.

Why do they choose us?

On time delivery, individual approach to every client and specification by managing and sourcing the movement of energy through the relevant infrastructures are the main rules we follow in our work.

Energy International Group Co

Having 4 offices around the world and a team of well-qualified specialists Energy International Group Co. adapts its services to every market.

We make efforts to find the most suitable solutions for every client to minimize risks and optimize opportunities. The trading presence of our company is supported due to reliable storage of the products, oil transportation and partnership with companies worldwide.

Having a team of experienced traders, Energy International Group Co., has found ways to increase oil production even in low-yield oil fields due to environment-friendly innovative solutions. High-end outputs are achieved through tried-and-true technologies, which are applied by the company.

Energy International Group Co

Energy International Group Co. cooperates with the leading International Organizations engaged in finance, engineering and trading. This close collaboration serves to develop energy projects on the international level.

The projects with the assistance of EIG lead to top-notch results in energetic sphere.

Oil consumption increases year by year. Thus, global oil demand reached the figures of 97 million barrels per day in 2017. Taking into account the fact that oil fields are located in certain places of the world, Energy International Group Co., offers both railway and sea shipment to deliver oil to distant countries that lack “black gold”.

Having a team of high-end specialists engaged in the sphere of transport logistics, the company offers affordable prices for fast and reliable shipment. That is why EIG is so popular among leading chemical, industrial, airline and national oil companies.

EIG is in tune with current circumstances, therefore Real Estate Projects are a part of its business as well. Having offices in Chicago, London, Nicosia and Kiev, the energy company develops the Real Estate Projects worldwide.

EIG finances these projects, which proves its stable financial status and leadership on the energy market.
